

Car Incident Report PDF Template

Purpose

Create a professional **Car Incident Report PDF** for vehicle accidents, damage claims, and inspection records.

The PDF should be formal, clean, easy to read, and suitable for printing, emailing, and internal record-keeping.

It should be based on structured incident data from a dashboard or form, then rendered into a final report after human review and sign-off.

1. Report Title

Car Incident Report

Optional subtitle:

- Vehicle Accident Report
 - Vehicle Damage Assessment Report
 - Motor Incident Report
-

2. Header Information

Include a header section with:

- Report ID
- Report date
- Report status
- Prepared by
- Reviewed by
- Signed off by
- Company / workshop name
- Contact details

Example:

- **Report ID:** CIR-2026-001
- **Date Created:** 26 July 2026
- **Status:** Pending Review / Confirmed / Signed Off

3. Reporter Information

Fields:

- Name
- Job title / role
- Contact number
- Email
- Department / workshop / company
- Relationship to incident

Example roles:

- Driver
- Owner
- Workshop staff
- Surveyor
- Witness
- Admin staff

4. Vehicle Information

Fields:

- Vehicle plate number
- Vehicle make
- Vehicle model
- Vehicle year
- Vehicle color
- VIN / chassis number
- Engine number
- Ownership type
- Driver name
- Driver contact

5. Incident Details

Fields:

- Incident date
- Incident time

- Incident location
- Weather condition
- Road condition
- Traffic condition
- Incident type
- Brief description

Possible incident types:

- Collision with another vehicle
- Rear-end collision
- Side impact
- Front impact
- Parked vehicle hit
- Single vehicle accident
- Hit-and-run
- Scrape / minor contact
- Flood / weather damage
- Theft / vandalism damage
- Other

6. Damage Summary

This is the most important part.

Show the vehicle damage in a structured way, not just as a paragraph.

Fields:

- Damaged part
- Damage type
- Severity
- Photo reference
- AI confidence
- Human verified
- Repair required or not

Possible damaged parts:

- Front bumper
- Rear bumper
- Left door
- Right door
- Front door
- Rear door

- Bonnet / hood
- Boot / trunk
- Headlight
- Taillight
- Windshield
- Side mirror
- Fender
- Wheel / rim
- Tire
- Roof
- Chassis
- Undercarriage

Possible damage types:

- Scratch
- Dent
- Crack
- Broken
- Bent
- Loose
- Missing
- Water damage
- Structural damage

Example:

Part	Damage	Severity	Photo	Verified
Front bumper	Dent + scratch	Moderate	P01	Yes
Right door	Deep dent	Severe	P02	Yes
Right side mirror	Broken	Moderate	P03	Pending

7. People Involved

Fields:

- Driver name
- Passenger name
- Other vehicle driver name
- Other vehicle plate number
- Witness name
- Witness contact
- Police officer name

- Workshop / surveyor name

If available, include:

- Injury status
 - Contact details
 - Statement
-

8. Witness Statement

Include a short section for witness notes.

Fields:

- Witness name
 - Witness contact
 - What they saw
 - Time of observation
 - Signature if needed
-

9. Actions Taken

Fields:

- Immediate action taken
- Vehicle moved or not
- Photos captured
- Police contacted or not
- Insurance notified or not
- Workshop informed or not
- Tow truck called or not
- Roadside assistance contacted or not

Examples:

- Area secured
 - Driver checked for injury
 - Photos taken from multiple angles
 - Vehicle moved to safer location
 - Report filed to police
 - Workshop informed for inspection
-

10. Authority / Police Report

Fields:

- Reported to police? Yes / No
- Police station
- Report number
- Officer name
- Date reported
- Reference number

This section is important for legal and insurance use.

11. Insurance / Claim Details

Fields:

- Insurer name
- Policy number
- Claim number
- Claim type
- Claim status
- Adjuster / surveyor assigned
- Workshop assigned
- Estimated repair cost
- Final approved cost

Claim types:

- Own damage
 - Third party
 - Third party fire and theft
 - Comprehensive
 - Special case
-

12. AI Analysis Section

This section is for the AI-generated draft, but it must remain editable by human reviewers.

Include:

- AI incident summary

- AI-detected damaged parts
- AI-detected severity
- AI confidence score
- AI suggested incident category
- AI suggested repair notes

Important:

- Show AI results clearly as suggestions
- Do not present them as final truth
- Human reviewer must confirm or edit

Example:

- **AI suggested damage:** Front bumper dent
 - **AI confidence:** 91%
 - **Human verified:** Yes
-

13. Timeline of Events

Show the incident as a timeline:

- 08:40 AM — Vehicle departed
- 09:10 AM — Collision occurred
- 09:15 AM — Photos taken
- 09:20 AM — Police contacted
- 09:35 AM — Workshop notified
- 10:00 AM — Report drafted
- 10:30 AM — Reviewed by human
- 11:00 AM — Signed off

This makes the PDF easier to understand.

14. Recommendations / Next Steps

Fields:

- Repair recommendation
- Replacement recommendation
- Inspection recommendation
- Disassembly required
- Follow-up action needed
- Preventive action suggestion

Examples:

- Replace right side mirror
 - Repair front bumper
 - Repaint right door
 - Further inspection required after disassembly
-

15. Additional Comments

Include free text for:

- Extra notes
 - Special circumstances
 - Unclear damage
 - Missing evidence
 - Follow-up information
-

16. Photos Section

Add a photo gallery inside the PDF.

For each photo:

- Photo number
- Caption
- AI tags
- Linked damaged part
- Timestamp

Example:

- Photo 1 — Front bumper dent
 - Photo 2 — Right door damage
 - Photo 3 — Side mirror broken
-

17. Sign-Off Section

Fields:

- Prepared by
- Reviewed by

- Approved by
- Signature
- Date
- Status

Example statuses:

- Draft
- Under Review
- Confirmed
- Signed Off

The PDF should not be treated as final until a human reviewer signs off.

18. Suggested PDF Layout

Recommended page structure:

Page 1

- Report title
- Header
- Reporter information
- Vehicle information
- Incident details

Page 2

- Damage summary
- People involved
- Witness statement
- Actions taken

Page 3

- Police / authority section
 - Insurance / claim details
 - AI analysis
 - Timeline
 - Recommendations
 - Photos
 - Sign-off
-

19. Design Style

The PDF should look:

- Clean
- Professional
- Formal
- Insurance-ready
- Workshop-friendly
- Easy to scan quickly

Use:

- Clear section headers
 - Tables for damaged parts
 - Short paragraphs
 - Consistent spacing
 - Company branding at top
 - Footer with report ID and page number
-

20. Important Instruction for Claude

Build this as a **car incident report PDF**, not a generic incident report.

It should focus on:

- vehicle details
- damage parts
- accident description
- photos
- witness information
- police/insurance reporting
- repair recommendations
- sign-off

The PDF is the final official document generated from structured incident data in the dashboard.
